GENERAL TEST METHODS

PSTC 101 (Method A-E) 180° PEEL STRENGTH
Measuring Unit : N/24mm (Force/Width)
General Test Conditions:
1. Steel Panel : SUS 302 or 304 BA finished
2. Specimen size : 24 ± 0.5mm x 300mm
3. Roller : Steel 85 ± 2.5mm diameter, 45 ± 1.5mm width, Rubber sleeve approx. 6mm thick & hardness 80 ± 5, Mass 2040 ± 45g.
4. Peel Speed : 300 mm/min or 5.0 ± 0.2mm/sec.
5. Environment : 23 ± 1°C & 50 ± 5% RH.

PSTC 101 (Method F) 90° PEEL STRENGTH

PSTC 107 (Method A, B, C & G) SHEAR STRENGTH (HOLDING POWER)
Measuring Unit : Hrs & mm (Drop & Creep)
General Test Conditions:
1. Steel Panel : SUS 302 or 304 BA finished
2. Specimen size : 12mm x 12mm or 24mm x 24mm (± 0.5mm).
3. Roller : Steel 85 ± 2.5mm diameter, 45 ± 1.5mm width, Rubber sleeve approx. 6mm thick & hardness 80 ± 5, Mass 2040 ± 45g.
4. Mass : 1000 ± 5g.
5. Environment : 23 ± 1°C & 50 ± 5% RH.

PSTC 107 (Method D, E & F) SHEAR STRENGTH (HOLDING POWER)
Measuring Unit : 48Hrs & mm (Creep)
General Test Conditions:
1. Steel Panel : SUS 302 or 304 BA finished
2. Specimen size : 12mm x 12mm or 24mm x 24mm (± 0.5mm).
3. Roller : Steel 85 ± 2.5mm diameter, 45 ± 1.5mm width, Rubber sleeve approx. 6mm thick & hardness 80 ± 5, Mass 2040 ± 45g.
4. Mass : 1000 ± 5g.
5. Environment : 23 ± 1°C & 50 ± 5% RH.

PSTC 6 TACK ROLLING BALL (INITIAL TACK)
Measuring Unit : Inches (Distance)
General Test Conditions:
1. Steel Ball : Diameter 7/16".
2. Specimen size : 2" x 15".
3. Environment : 23 ± 1°C & 50 ± 5% RH.

RESISTANCE MEASURING METHOD
Measuring Unit : Ohm (R = V / I)
General Test Conditions:
1. Copper Electrodes : 1cm x 1cm square area
2. Specimen size : >1cm x >1cm square area
3. Environment : 23 ± 1°C & 50 ± 5% RH.
### VISION
To be a globally competitive enterprise, best known for providing viable solutions, quality products and reliable services.

### MISSION
Establish long term business relationship with parts fabricators, material converters and users in the electronic related industries by virtues of sincerity and modesty.

### QUALITY POLICY
To provide products and services in their utmost consistent quality, so as to satisfy customers' continuous needs and expectations.

### OBJECTIVES
1. To provide competitive products and services in our target markets.
2. To deliver our products in their utmost consistent quality.
3. To respond to customers' queries and provide on time solutions.
4. To constantly review our business, create new products and services.

### INTRODUCTION
Edehege (ADH) is a customer-oriented group of companies operating in this region. Due to the ever growing demands in the market for better products and services, ADH was established in the year 2000 by Edehege Adhesive Products Pte Ltd in Singapore, followed by Edehege Film Products Co Ltd in Taipei Taiwan, Edehege Bond Material Co Ltd in Wuxi China and Edehege Industrial Products in Bangkok Thailand.

Together, we strategically coordinated our products and services to satisfy our customers' growing needs and expectations.

Through the optimisation of our expertise and resources, ADH is capable of ensuring price competitiveness (bulk purchase), shorter delivery lead time (keep stock & minimise MOQ) and quick response to our customers within our respective strategic locations.

ADH is also able to provide customised single or multilayered materials to improve our customers' production efficiency and effectiveness.

ADH always says “We stick to your requirements”.

---

### Tapes & Films Converting Machines

**HC7001**

**Fully Auto Single Shaft Tape Cutter**

**Application:** for cutting marking, double side, foam & cloth tapes, etc.

**Specification:**
- Machine Width: 1.08M/ 3.041M/ 6M
- Max. Cutting O.D.: 0.200mm (standard) / 0.300-0.400mm (optional)
- Cutting Core O.D.: 0.17-0.30”
- Cutting Knife: 0.390mm (standard)
- Cutting Angle: can be adjusted from 45 degree automatically
- Min. Cutting Width: 2mm
- Knife feeding: by hydraulic system (standard)

**Optional parts:***
1. Other size cutting shaft. It can be made as per the required core i.d.
2. Cutting supporter: for supporting the roll when cutting core below 30mm.
3. Safety cover: to protect operator during production.
4. Sharpening device: grinding knife in the machine to save time for taking blade off.
5. Knife feeding: is controlled by some motor.

**Main functions:**
- Adhesive tapes, semi-processed PET, OPP, PP tapes, acrylic paper tapes, etc.

**Technical parameter:**
- 1.0M/1.2M/1.5M/1.8M
- Max. cutting width: 0.200mm (0.300-0.400mm is optional)
- Max. cutting core: 0.390mm
- Min. cutting width: 2mm
- Sharpening angle: 90°-0°

---

**HCSR3310**

**Duplex Center Slitting Rewinder**

**Application:** 2 shafts center type slitting, suitable for slitting various films, paper, (optional adhesive tape)

**Specification:**
- Machine Width: 1.06M / 3.06 / 8.5M
- Rewind Core i.d. 0.07”
- Max. Rewind O.D.: 0.1000M
- Min. Slitting Width: 50mm
- Shaft Speed: 2000M / Min

**Main function:**
- PET, PVC, OPP, Alu Foil, laminating materials and so on.

**Technical parameter:**
- 1.0M/1.2M/1.5M/1.8M
- Max. winding weight: 0.8 Kg
- Max. winding diameter: 450mm
- Max. winding speed: 200M / Min
- Shaft tolerance: ±0.03”

---

**Fast Moving Main Products**

**Precision Multi-stage Laminators**
- Range: Single to 5-stage laminating stations
- Material width: 200, 300 and 400mm
- Standard steel shafts or air shafts combination
- Single stage power supply
- Cascade with any other machines

**Precision High-speed Die-cut Machines**
- Platform size: Small 200(IN)x 180mm; Medium 280(IN)x 250mm; Large 420(IN) x 320mm
- Up to 220 strokes per minute
- Feeding tolerance below 0.1mm
- Full Functions: Input tension guide; 7in colour touch panel; Auto oil lubrication; Sheet cutter; Mark tracing sensor; Online sensors; Non-tension unwind and rewind etc.
- Standard steel shafts or air shafts combination
- Easy to operate
- Compact saves space!

**Precision Sheet Cutting Machines**
- Material Width: Small 320mm; Medium 420mm; Large 700mm
- Up to 120 strokes per minute
- Workable Length from 1 to 999mm
- Feeding tolerance below 0.2mm at 500mm.
- Full Functions: Input tension guide; 5in colour touch panel; Online sensors; Non-tension unwind etc.
- Standard steel shafts or air shafts combination
- Single phase power supply
- Plug & play, no hassle!

---

### Characteristics

**Small Precision High-speed Die-cut Machines**
- Compact saves space!
- Standard steel shafts or air shafts combination
- Mark tracing sensor; Online sensors; Non-tension unwind and rewind etc.
- Feeding tolerance below 0.1mm
- Up to 220 strokes per minute

**2-Stage**
- Range from Single to 3-stage laminating stations
- High bonding strength
- Good dimension stability
- High bonding strength
- Excellent for for-die-cutting process

**3-Shafts**
- Range from Single to 3-stage laminating stations
- High bonding strength
- Good dimension stability
- High bonding strength
- Excellent for for-die-cutting process

**3-Shafts**
- Range from Single to 3-stage laminating stations
- High bonding strength
- Good dimension stability
- High bonding strength
- Excellent for for-die-cutting process
